Anass Benharbit

Montreal, QC (relocating from Ottawa) | +1 (613) 890 5139 | benharbitanass@gmail.com | linkedin.com/in/anass-benharbit | github.com/AnassBenh | anassbenh.github.io/Portfolio

PGWP planned post-graduation (Apr 2026) | French (native), English (fluent), Arabic (fluent), Spanish (intermediate)

SUMMARY

- Computer Science (Honours) new grad combining client-facing sales with hands-on technical delivery (data/ML prototyping, analysis, and technical documentation) to support customer outcomes.
- Seeking a Solutions Engineer / Sales Engineer/ Data Analyst role; comfortable translating customer requirements into clear demos/POCs and explaining technical trade-offs to technical and business stakeholders.

EDUCATION

Honours BSc Computer Science, Management & Entrepreneurship Option - *University of Ottawa (Ottawa, ON)* | Sep 2022 - Apr 2026 (expected)

French Baccalaureate (STEM), with honours - Louis Massignon International High School (Casablanca, Morocco) | 2017 - 2022

TECHNICAL EXPERIENCE

- **AI Data Annotator (LLM Evaluation) -** *Outlier (Remote)* | Oct 2025 - Present
  - Completed **50+ tasks/week** evaluating and ranking multimodal LLM outputs (image/video understanding + editing scenarios) against detailed rubrics; wrote clear, actionable feedback to improve quality and consistency.
  - Documented scoring rationale for ambiguous/edge cases and ensured guideline compliance across diverse prompt types and difficulty levels.
  - Strengthened evaluation reliability by maintaining high-throughput, repeatable assessments and producing structured notes that support iteration on prompts and reference answers.
- **Data Analyst Intern (Payments / Fraud POC) -** *HPS (Casablanca, Morocco)* | May 2025 - Jul 2025
  - Built an end-to-end transaction monitoring POC (Oracle + Python) for fraud-risk scoring and recurring-transaction detection, aligned with payments/fraud use cases.
  - Engineered **12 interpretable behavioral/time features** (client/merchant baselines, time-between-transactions, recurrence flag, day-of-week/hour/month, and delta-to-average signals) and scored anomalies with an **Isolation Forest** pipeline (StandardScaler + IF).
  - Wrote *fraud_score/is_fraud* to Oracle, generated EDA visuals, and exported flagged transactions to CSV.

SELECTED PROJECTS

- **Fraud & Recurrence in Transactions using ML** - *(Python, scikit-learn, pandas, Oracle SQL/cx_Oracle, Matplotlib/Seaborn)* **(GitHub:** Code**)**
  ML prototype (Isolation Forest) to flag suspicious (potentially fraudulent) transactions and detect recurring transaction patterns, iterating on feature design and thresholds to improve detection quality.
- **Android Application (SEG-2505)** - *(Java, Android Studio, Android SDK, XML, Git/GitHub)* **(GitHub:** Code**)**
  Multi-role Android app (admin, employee, client) with service CRUD and branch search (address/service/hours); clean navigation, permission aware.
- **AI / ML / DL Coursework (CSI-4506)** - *(Python, Jupyter Notebook, pandas, NumPy, Matplotlib, scikit-learn)* **(GitHub:** Code**)**
  End-to-end ML/DL notebooks (Python/Jupyter): preprocessing, training, evaluation, and tuning; compared multiple models with reproducible experiments, clear metrics, and structured write-ups.

CUSTOMER-FACING EXPERIENCE

- **Customer Service & Sales -** Pandora | Hudson's Bay | Rogers (via Cydcor) - Ottawa, ON | 2022 - 2026
  - Handled 50+ customer inquiries/day; resolved 95% on first interaction; improved response times through task prioritization in fast-paced environments.
  - Prospected 20+ clients/day and closed 4-5 deals/day on average (telecom); consistently met retail sales goals and delivered high-quality customer experiences.

LEADERSHIP & VOLUNTEERING

- **Founder / Team Lead** - *Team Matrix (Casablanca, Morocco)* | Sep 2017 - Jun 2022
  Led Morocco's most decorated FLL/WRO robotics team; international competitions across 6 countries; mentored a 10-member team.
- **Volunteer** - Nord-Sud Action (Casablanca, Morocco) | Sep 2021 - Aug 2022
  Distributed 200+ meals; supported 50+ children per visit; contributed to clean-ups collecting 100+ kg of waste.

SKILLS

Technical: Python (pandas, scikit-learn), SQL(Oracle, PL/SQL), Java, Git/GitHub, Go
Data/ML: Feature engineering, ML prototyping, model evaluation, anomaly detection
Professional: Client communication, technical writing, troubleshooting, requirements discovery
